A NATIONAL ACO'S STRATEGY FOR MANAGING PAYERS AND NEGOTIATING CONTRACTS WHAT WE'D LIKE TO SHARE WITH YOU TODAY

Contracting strategy: How can you improve your chances of success when taking on a new risk-based contract?

Data infrastructure: What's the right approach to building an enterprise-grade, scalable data infrastructure to support your performance against multiple contracts?

Data issues and gaps: When there are issues with the data you receive from a payer, what can you do? How does having the right data management partner help you succeed?

Operationalizing insights: What are effective ways to disseminate information through your organization to support contracting and drive outcomes?

A NATIONAL ACO'S STRATEGY FOR MANAGING PAYERS AND NEGOTIATING CONTRACTS STEWARD HEALTH CARE NETWORK

Like many of you, we are a **clinically-integrated, physician-led ACO** serving Commercial, Medicare, and Medicaid populations

OUR MISSION	HOW WE CREATE VALUE
 Achieve the quadruple aim: Better care of individuals Better health for populations Lower cost Drive value to physicians outside of the traditional fee for service construct 	 Quality Management Care and Utilization Management Accurate Risk Adjustment Care Retention Network Governance and Performance Management

A NATIONAL ACO'S STRATEGY FOR MANAGING PAYERS AND NEGOTIATING CONTRACTS OUR VERTICAL AND HORIZONTAL APPROACH TO CARE DELIVERY

STEWARD HEALTH CARE SYSTEM LLC

Steward Hospital Management Company

 Operations across three continents, including 40 hospitals, more than 6,600 physicians, and
 12 million patient encounters.
 Built a system that improves outcomes, lowers cost and
 establishes lasting partnerships
 with local communities. Steward Medical Group ("SMG")

- ~1,425 employed providers across
 MA, PA, OH, FL, TX, UT, AZ, AR, & LA
- 3000+ total employees, ~ 500 PCPs at 433 practice locations

Physician Affiliated Businesses

 Home Care and Hospice, elCU, Mobile Oncology (PET) Imaging, Tailored Risk Assurance Company

Steward Health Care Network ("SHCN")

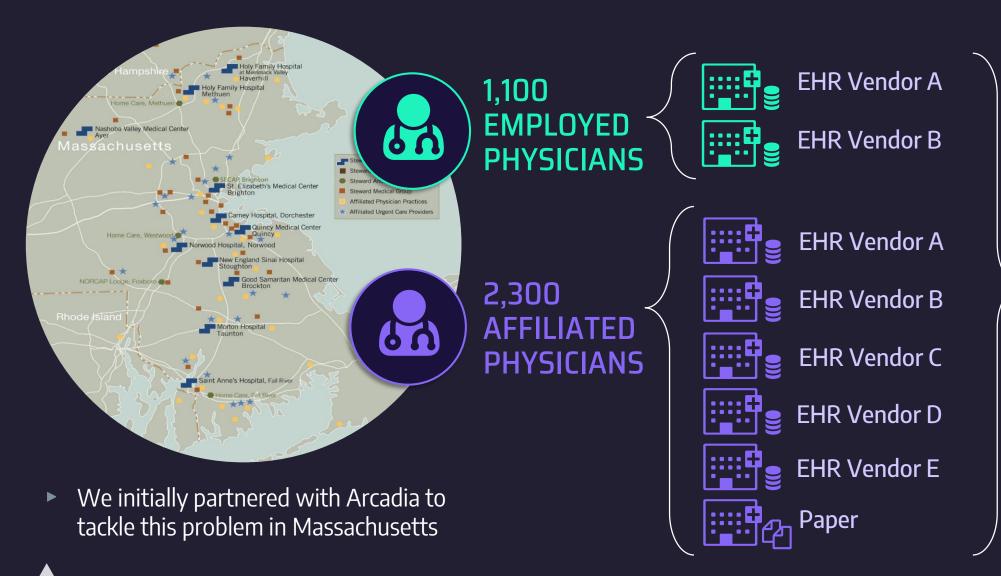

- Largest care management /ACO in New England and soon to be one of the largest in country
- Highly integrated physician network and managed care contracting entity
 - >1,300,000 covered lives under value-based contracts (2018P)
- ~5,500 contracted physicians including approximately 1,800 PCPs, 3,700+ specialty physicians and 250+ mid-levels
- Managed the 4 health plans (Medicare x 2, Medicaid x 2

Steward is a nationally recognized, fully integrated, healthcare system centered around community care as a means to meet the increasing market demand for value.

A NATIONAL ACO'S STRATEGY FOR MANAGING PAYERS AND NEGOTIATING CONTRACTS STEWARD HEALTH CARE NETWORK FOOTPRINT

A NATIONAL ACO'S STRATEGY FOR MANAGING PAYERS AND NEGOTIATING CONTRACTS WE HAD EARLY DATA INTEGRATION CHALLENGES

PATIENT RISK INFORMATION Distributed across 80+ EHRs and paper records.

COMPANY OVERVIEW ABOUT ARCADIA

Arcadia is the only healthcare data & software company dedicated to healthcare orgs achieving financial success in value-based care. Our purpose-built pop. health platform delivers enterprise-level transformational healthcare outcomes.

2.5×

HIGHER ACO

PERFORMANCE

A NATIONAL ACO'S STRATEGY FOR MANAGING PAYERS AND NEGOTIATING CONTRACTS OUR MISSION IS YOUR SUCCESS IN VBC

OUR MISSION

HOW WE WORK TO MEET THOSE GOALS

COMPANY OVERVIEW TRANSFORMATIONAL CUSTOMER RESULTS

BENCHMARK imes risk adjustment — medical expense improvement quality improvement

81%

4DAYS

\$**8**k

RISK ADJUSTMENT IN-VISIT DIAGNOSIS CAPTURE

Arcadia's risk suspecting algorithms comb through EHR and Claims data sets to suggest possible conditions for a patient. Our point of care workflow tools get these insights Infront of physicians, creating an 81% improvement in in-visit diagnoses.

RISK ADJUSTMENT MORE RAF CAPTURED

Arcadia's 360° health risk assessment uses machine learning to suggest patient conditions. This adds decision support to an Annual Wellness Visit, resulting in 52% more RAF than just using AWVs alone & ~\$330 in additional premium per member.

MEDICAL EXPENSE REDUCTION IN POST ACUTE ALOS

Arcadia Analytics was used to build a high-performance post acute network, identifying those facilities with high volume to performance ratios. Our platform coordinated care between the PCP and SNF, reducing Average Length of Stay by 4 days.

MEDICAL EXPENSE REDUCTION IN ED VISITS

6%

99%

Arcadia's ED Propensity score, which predicts patient level ED activity, was used in conjunction with provider level performance reporting to reduce ED visit volume by 6% and improve outcomes for vulnerable patients.

MEDICAL EXPENSE REDUCTION IN \$ POST DISCHARGE

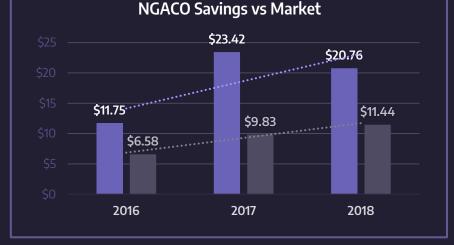

Arcadia utilizes ADT pings and predictive models to identify patients with high transition risk for triage by care teams. TCM visits are scheduled with a PCP resulting in fewer readmissions and an ~\$8k reduction in medical spend per TCM visit.

QUALITY IMPROVEMENT ON TARGET ACROSS 33 MEASURES

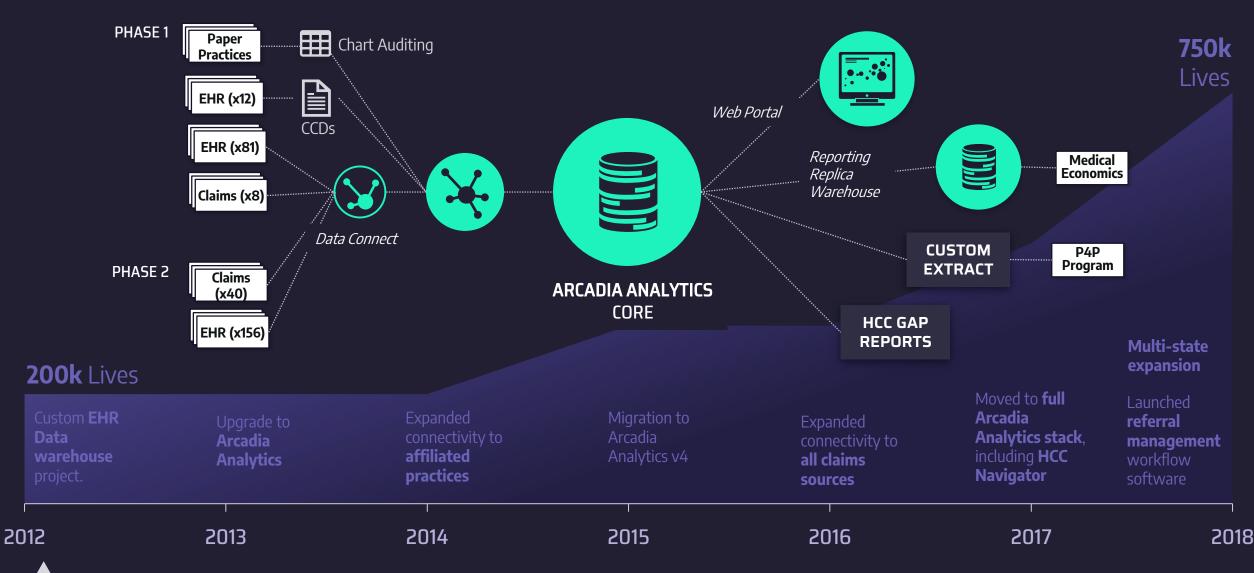

Arcadia's platform combines EHR and Claims data to get realtime insight into contract measures. This system targeted patients with the most gaps, achieving 99.6% against a composite measure target and maximizing bonus payment.

MSSP Savings vs Market \$14 \$12 \$10 \$8.89 \$8.89 \$8.89 \$8.77 \$6.27

📕 Arcadia ACOs Average Bonus (PMPM) 📕 All other ACOs Average Bonus (PMPM)

A NATIONAL ACO'S STRATEGY FOR MANAGING PAYERS AND NEGOTIATING CONTRACTS STEWARD AND ARCADIA: A 10-YEAR PARTNERSHIP

A NATIONAL ACO'S STRATEGY FOR MANAGING PAYERS AND NEGOTIATING CONTRACTS RESULTS FROM THE ARCADIA-SHCN PARTNERSHIP

Referral Management Platform.

Co-developed innovative referral management platform focused on managing referral patterns for High Tech Radiology and High Cost Specialty Services

STAR Rating. Real-time EHR data integration used to improve Health Plan STAR Rating from 2 Star to 3 Star in 6 months

Risk Adjustment ROI. 12:1 ROI for HCC Risk Adjustment program focused across all riskadjusted lines of business driven from 6% improvement of HCC risk score in Medicare products and 4% in Commercial

Reduced SNF ALOS by 7 Days. Decreased SNF ALOS over 4 years from 26 days to 19 days through development of preferred post-acute network and enhanced discharge planning program

Downward TME Trend. Reduced TME trend from 7.5% to 2.3% over 5 years across managed lines of business

Medicaid Performance. "Broke" Medicaid cost corridor

A NATIONAL ACO'S STRATEGY FOR MANAGING PAYERS AND NEGOTIATING CONTRACTS MANAGING 40 CONTRACTS ACROSS 9 STATES

Performance management requires 1) an advanced data infrastructure, 2) getting the right data from managed care partners, and 3) a tight partnership between contracting and data management

1 Advanced Data Infrastructure

- Scalable for national ACO
- ► Enterprise-grade security (ideally, HITRUST CSF^{®™} Certified)
- Robust, "fit for use", trustworthy data

2 The Right Data from Managed Care Partners

- Supports the creation of a longitudinal patient record and the needs of population health programs
- Timely
- Accurate and complete
- Consistently formatted

3 Expert Data Management

- Active monitoring, curation, and use of longitudinal patient data to support value-based contracts and patient interventions
- Proactive identification and resolution of data issues before they manifest in applications

A NATIONAL ACO'S STRATEGY FOR MANAGING PAYERS AND NEGOTIATING CONTRACTS WHAT ELEMENTS DO YOU NEED TO SUCCEED UNDER RISK?

On an **individual contract** basis, SHCN assesses:

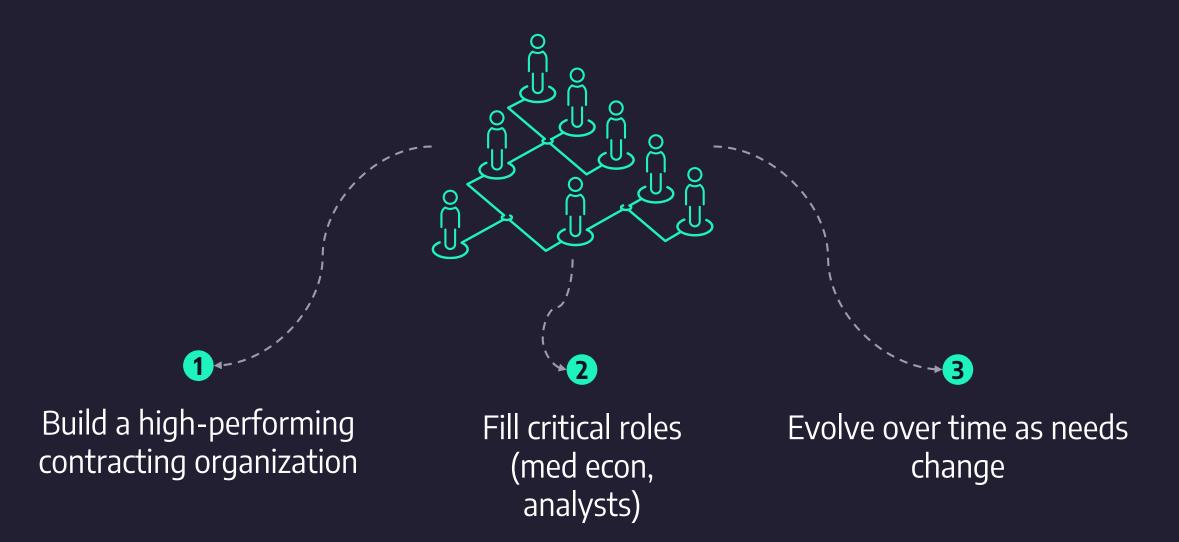

- Attribution model and process for disputes
- Popultion floor (at least 25,000 lives)
- Fee-for-service multiplier
- Shared Savings Program bonus structure
- Management fee to help with infrastructure investments, because shared savings may not be available until after the performance year (12-24 months out)

Across contracts, SHCN assesses:

- Can quality measures be similarly structured to ensure efficient operations?
- Is there delegation for utilization management and care management?

A NATIONAL ACO'S STRATEGY FOR MANAGING PAYERS AND NEGOTIATING CONTRACTS HOW DO YOU ORGANIZE YOUR TEAM FOR PERFORMANCE?

FGY FOR MANAGING PAYERS AND NEG WHAT DATA DOES YOUR PARTNER NEED TO PROVIDE?

Member Months.

Claims and Line Detail. Detail on services and rendering providers enable ACO to understand and address variability in cost and quality of care.

Reconciliation Reports/Fund Reports.

Verify, then trust.

Cost (TME). This must include the <u>paid</u> <u>amount</u> for accurate budgeting.

ADT data. Supports real-time care coordination response when patients have emergent or critical care needs.

Attribution/Eligibility. Ensure performance is measured against the right population and that you are receiving complete claims data for lives under risk.

A NATIONAL ACO'S STRATEGY FOR MANAGING PAYERS AND NEGOTIATING CONTRACTS MANAGING DATA SHARING CHALLENGES

Not every payer can or will provide the data you need to perform on a risk-based contract...

...do you have effective strategies to manage these challenges?

A NATIONAL ACO'S STRATEGY FOR MANAGING PAYERS AND NEGOTIATING CONTRACTS WHERE DO YOU NEED TO SUPPLEMENT DATA GAPS

An advanced data infrastructure will allow your ACO to incorporate multiple data types to supplement the information you get from claims data

PatientPing (ADT) Real-time notifications about

emergency or inpatient care support better care coordination

EHR Data

Clinical detail for better assessment of patient care needs and risk gaps

SDoH Clearer picture of the socioeconomic and demographic factors that can substantially impact a patient's health

Lab Data Timely information about patient health

A NATIONAL ACO'S STRATEGY FOR MANAGING PAYERS AND NEGOTIATING CONTRACTS BE ON THE LOOKOUT FOR KEY DATA ISSUES

Deidentified mental health and substance abuse claims. Many payers will deidentify claims related to SMI or SUD, which hampers ACOs from doing important care coordination work for patients with physical and mental health co-morbidities.

Blinded cost data. ACOs are held accountable to a benchmark which is cost-based. Without actual cost data, the ACO will struggle to reconcile expenses.

Attribution. Attribution errors or changes commonly impede reconciliation.

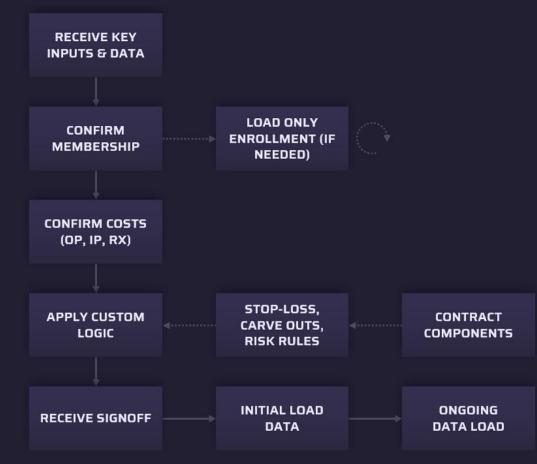

Inconsistent files. It is extremely common for payers to send files where structures and data sets change significantly from month to month. Data cannot be loaded automatically; time must be invested to make sure that the data are valid and properly formatted each month.

A NATIONAL ACO'S STRATEGY FOR MANAGING PAYERS AND NEGOTIATING CONTRACTS HOW YOUR DATA PARTNER CAN HELP

A close partnership between your VBC Operations and Contracting teams and your data platform vendor assures an advanced data infrastructure that supports key needs.

- CONTRACT CONFIGURATION Each contract has its own specific nuances requiring flexibility in data load approach
- GROUPERS Customizable groupers by product allow for nuances in contracts and attribution approaches
- DATA RECONCILIATION Attribution changes, stop loss, and carve outs all need to be accounted for to get data that can be tightly reconciled with payer reporting
- DATA QUALITY A highly-detailed claims refresh process should have automated and human process gates
- DATA MODEL Medical economists have specific needs and need a data model purpose-built for their work
- FOUNDATIONAL ELEMENTS Complex ACOs need configurable attribution and the ability to accommodate complex provider hierarchies

CLAIMS DATA VALIDATION & MONTHLY REFRESH THE IMPORTANCE OF DATA QUALITY

This process represents Arcadia's commitment to providing the highest quality of data to support our customers' success, acknowledging that claims datasets are the cornerstone of this success in many facets of Value Based Care. To accomplish that, Arcadia must prevent data quality issues from entering our suite of applications, even when there are issues or unexpected changes in the processes that result in claims data being sent to Arcadia.

To support this, Arcadia executes a broad set of automated tests prior to allowing claims data to load into the application, with manual review by a team member familiar with your data and your contracts prior to releasing the data for loading. Any issue that is discovered that cannot be resolved immediately will result in the claims feed in question being excluded from the data load until resolution. This may result in additional data lag, but will protect at all times the integrity of the data in active use within our product that you rely on. Put simply, this model is built on a philosophy where we believe it is better to hold on incremental data, than introduce a data quality issue.
