and Aurrera Health Group

4:45 – 5:00 pm **Report out and Wrap-up**

Melody Danko-Holsomback

Overall Learning Lab Project Objectives

Understand the needs of ACOs engaging in Medicaid contracts, gather information from leaders in the field, provide a forum for further discussion on how to better serve and care for Medicaid beneficiaries including social and behavioral needs and address workflows and ROI to sustain resources to meet the ACO needs.

Strategic Objectives

- Define needs through surveys, meeting activities and ongoing group discussions

- Develop a plan to meet educational needs of participating ACOs

- Create the platform for discussion, brainstorming and documentation of best practices that are identified

Team and Group Objectives

- Present current state of Medicaid population management

- Identify gaps in information and ACO needs

- Develop materials, events, or recordings for future use by ACOs

Activities

- Kickoff meeting for project topic

- Creation of strategic virtual workgroups focused on topic goals if needed

- Document groups strategic needs and best practices

Outcome

Series of learning events for ACOs to participate in and learn from each other including follow-up meetings on topic with in-depth discussion that result in structured outcome materials, webinars, and conference sessions on areas of interest concerning the Medicaid population.
