

Building a Data-Driven Value-Based Care Organization Based on Trust, Shared Vision, and Physician Engagement

George A. Jenckes III, MD, MS, FACP
CEO, Tower Health Partners®

September 10, 2019

- Governance
- Network Growth and Engagement
- Value Equation and Importance of Data
- Defining the Future of Data

Membership Growth and Engagement

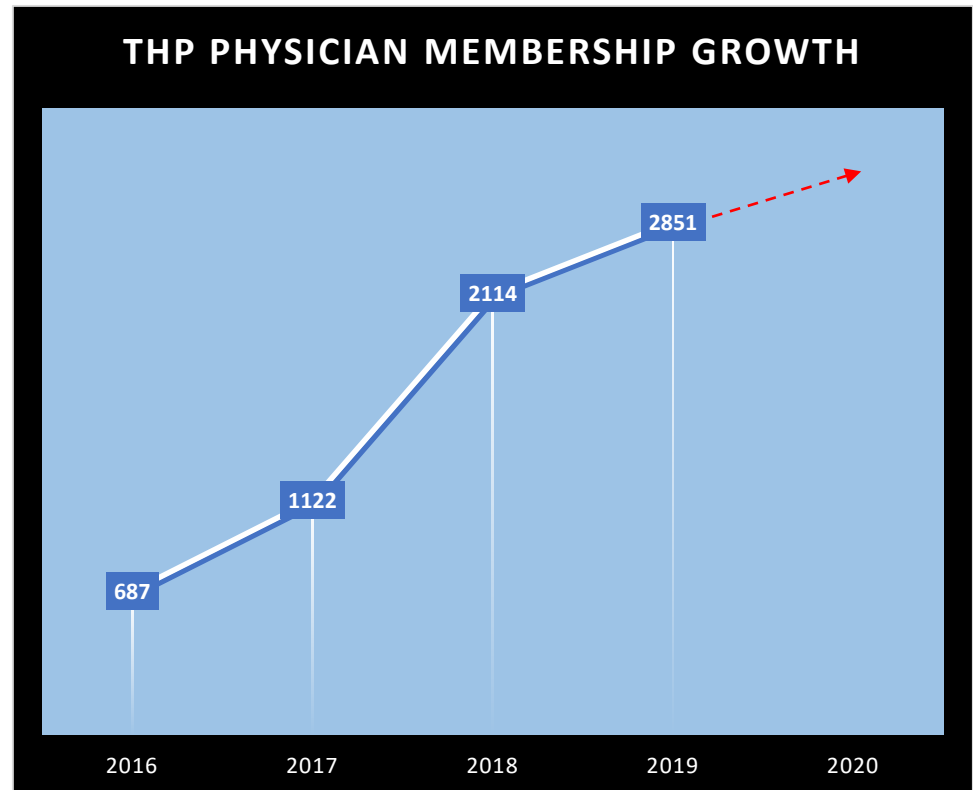

Engagement Strategies

PCP

- Patient-Centered Medical Home (PCMH)
- Coordination with and access to preferred specialists
- Financial incentives through VBC arrangements

Specialist

- Increase patient volumes via an e-referral program
- Outmigration mitigation
- Specialty Medical Home Model

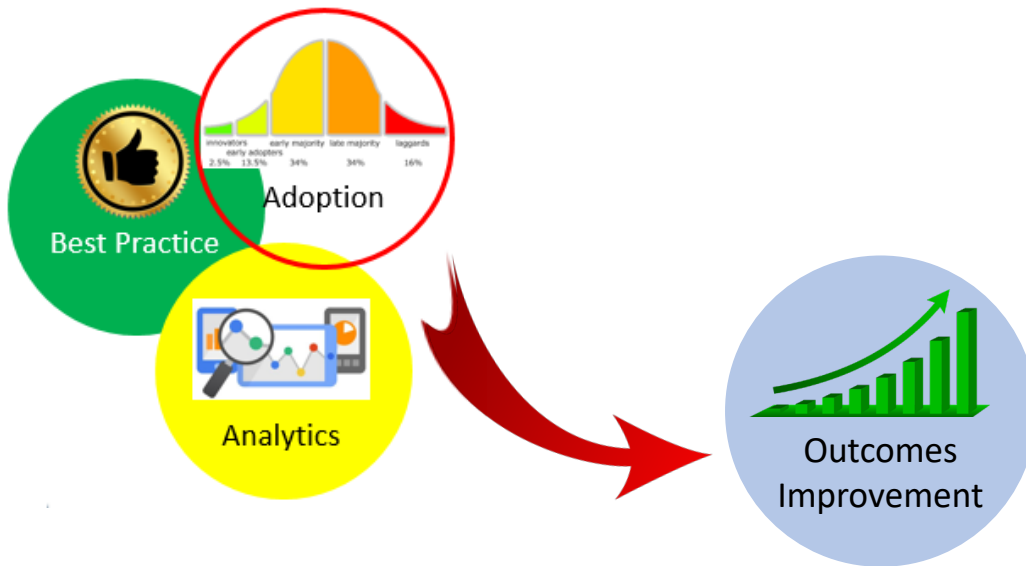

Data as a Driver: The Value Proposition

- Data must be...
 - Relevant, timely, and valid to physicians and their practices
 - Quantifiable, accountable, actionable
 - Different, understandable, visual, provider-friendly format

Challenges to Delivering on the Value Proposition

- Connecting the physician network
- Wide variety of unique EMRs
- Assimilating payor and provider data
- Communication/access/education

Importance of Data

- CIN participation requirements
- Contract management
- Population health
- Outmigration
- Clinical decision support
- Process improvement
- Risk Stratification
- Social determinants of health (SDOH)
- Financial data integration

Approaching Data Interoperability

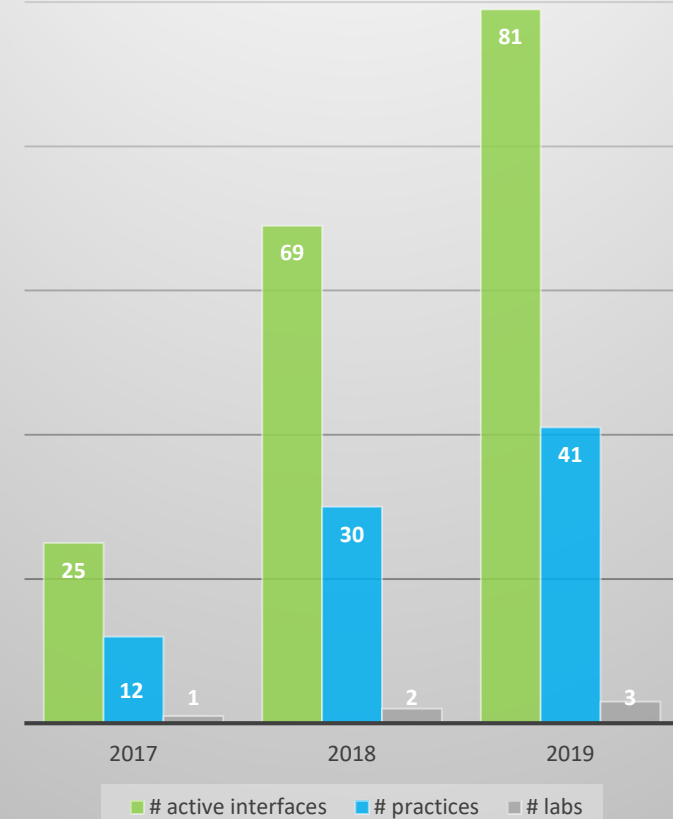

- Physicians on the Clinical Informatics committee led efforts to vet and approve a cloud-based interoperability solution to address THP's data challenges
- Solution needed to meet THP's needs: data collection, data validation, dashboard reporting, administrative control
- Solution needed to be knowledgeable of EMR platforms, flexible, scalable, and established in the market
- Solution needed to prioritize the end-user from both an analyst perspective for report building and accessible/easy to use for physicians

Technology Infrastructure

Interoperability

- Cloud-Based Data Platform
- Provider Dashboard
- Clinical Exchange HIE Connect and Portal Access
- Financial Modules for Contract Management

CIN Interface Progress

The Future of Data

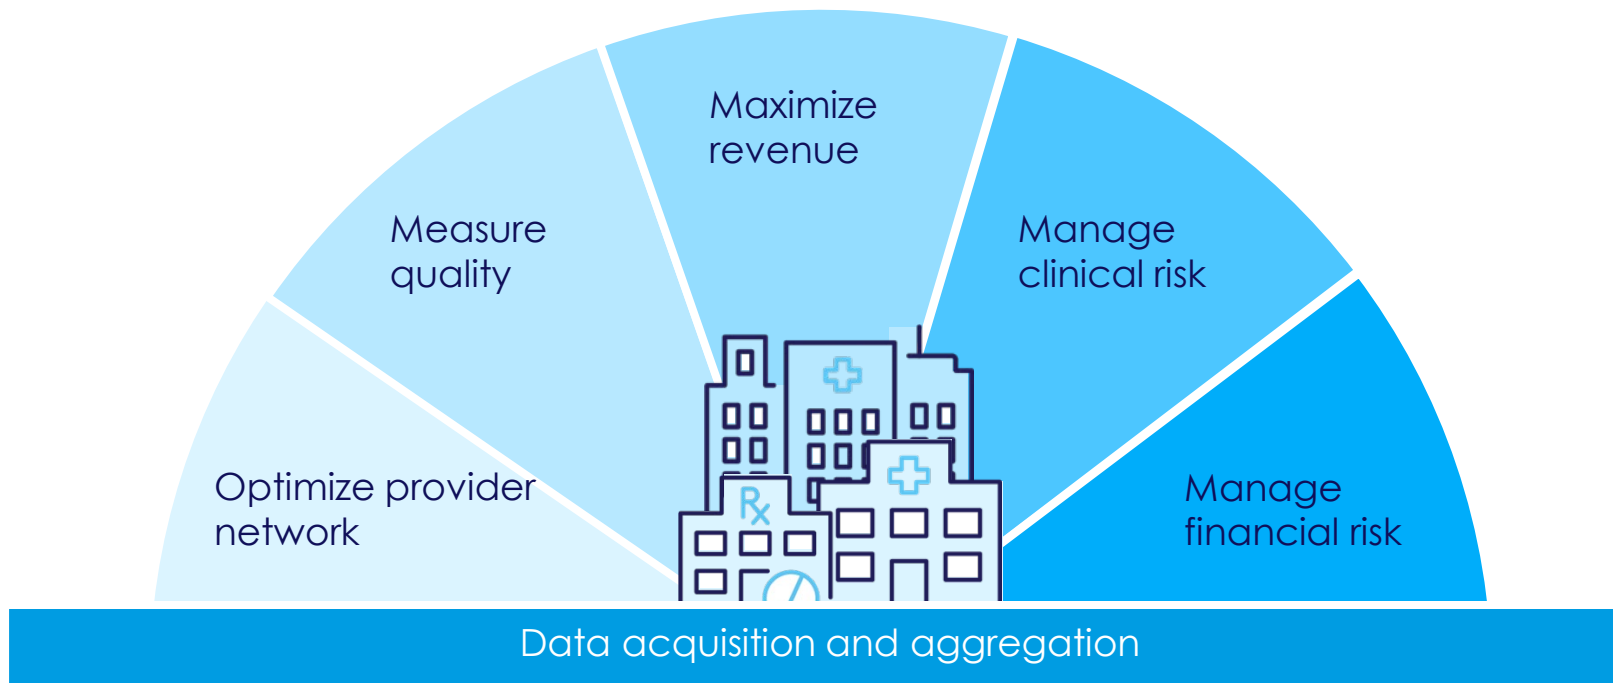

- Leveraging clinical data for meaningful quality outcome measures
- Financial integration and cost containment
- Reduce reliance on payor/health plan data
- Challenge payor methodologies for value-based arrangements
- Create pathways to risk/APMs/new models

Tower Health Partners®

Advancing Health. Transforming Lives.

A successful value-based care strategy demands that your organization

Change Healthcare Value-Based Care and Population Health Analytics Solutions

Reduce variation in care to minimize downside risk

Stratify populations and identify their health risk components

Episode Insights

Improve patient care and maximize value-based reimbursement

Quality Measure Insights

Clinical Risk Insights

Optimize financial performance associated with risk contracts

Manage network leakage and top line growth

Network Leakage and Risk Discovery Insights

Financial Risk Insights

Intelligent Healthcare Data Platform™

Acquire clinical and financial data **once** to simplify and support value-based care
